Company Overview

History

Founded in 2020, Pakistan Engineering Industry introduced Triple Coated Core technology for the first time in Pakistan.

We specialize in manufacturing high-performance copper brass radiator cores and complete cooling assemblies, designed with advanced machinery and precision engineering.

With over five years of experience, our commitment to innovation, quality, and reliability has earned us a strong reputation across industries including agriculture, commercial vehicles, loaders, excavators, and gensets.

Mission

To design and manufacture durable, high-performance radiator cores and assemblies that meet the toughest industrial and automotive demands upholding quality through precision, reliability, and sustainable manufacturing excellence.

Vision

To become a globally recognized leader in radiator manufacturing, known for engineering innovation, uncompromised quality, and trusted partnerships, while driving the modernization of Pakistan's industrial and automotive sectors.

Philosophy

At PEI, engineering is a craft built on trust and precision. We combine technical mastery with integrity and innovation to deliver cooling solutions that endure the toughest conditions and earn lasting customer confidence.

Core Values

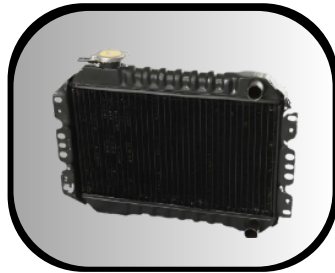

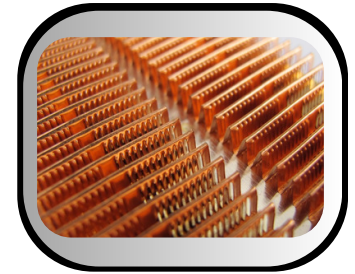

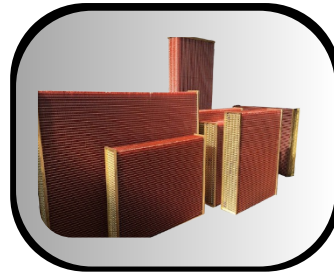

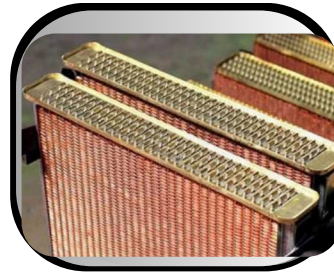

- Quality Excellence – Delivering products that meet international standards of performance and durability.
- Innovation – Investing in technology and process improvement for smarter cooling solutions.
- Customer Focus – Building lasting relationships through reliability and support.
- Teamwork – Empowering skilled engineers and fostering technical growth.
- Sustainability – Promoting efficiency, waste reduction, and responsible manufacturing.

Product Category

Radiator Cores

At Pakistan Engineering Industry, we manufacture premium copper brass radiator cores in zigzag and flat fin designs to provide efficient heat transfer that ensures optimal cooling performance at all times. Each core is built with precision and durability in mind, delivering consistent performance across a wide range of industrial and automotive applications.

Assemblies

Our custom assemblies are crafted with precision to deliver seamless integration and superior long-lasting performance in various industrial machinery and vehicles. Each design is tailored to meet specific thermal and structural requirements, ensuring maximum efficiency, reliability, and durability in even the most demanding operating conditions.

Precision Cooling Solutions for Every Industry

Automotive

We offer a wide range of Copper Brass radiators which include over 400+ developed models for new & old vehicles including vintage and sports cars of brands like Toyota, Honda, Mercedes Benz, Volvo & FIAT

Heavy Duty

High-performance cores and cooling assemblies engineered for commercial and heavy-duty vehicles, ensuring superior heat transfer, durability, and consistent on-road performance compatible with brands including Hino, Isuzu, Bedford Vehicles & Caterpillar

Agriculture

Durable radiators and cores for tractors and farm machinery, delivering long-lasting cooling performance with replacement parts for brands like Massey Ferguson, Belarus, John Deere & New Holland Tractors

Partnerships and Future Outlook

Clients & Partners

DP WORLD

پاکستان سول ایوی ایشن اتھارٹی

Pakistan Engineering Industry is proud to be a trusted partner to leading organizations across Pakistan's industrial and infrastructure sectors. Our valued clients include the Civil Aviation Authority, Karachi Port Terminal, Orient Energy, and Allied Engineering. These partnerships reflect our proven capability to deliver high-performance cooling solutions that meet demanding operational standards with precision and reliability

Global Expansion & Exports

Building on our strong foundation in Pakistan, Pakistan Engineering Industry is actively expanding its global footprint across the **Middle East, the United Kingdom, Europe, and North America**. Our vision is to forge long-term international partnerships, exporting world-class radiator cores and assemblies that showcase Pakistan's engineering excellence to global markets. With a focus on consistent quality, precision manufacturing, and timely delivery, we aim to become a trusted supplier for OEMs, distributors, and industrial clients worldwide.

Certifications

Pakistan Engineering Industry is an **ISO 9001:2015** certified manufacturer that partners with **SGS** for independent material verification and testing. Through chemical, mechanical, and performance analyses, we ensure our copper materials and radiators meet the highest international standards for quality, durability, and reliability across all production stages. We adhere to stringent international quality standards through every stage of production.
